

Fire Incident Toronto

FIRE INCIDENT DATA FROM THE CITY OF TORONTO OPEN DATA PORTAL

UP TO
**DECEMBER 31,
2023**

COMMERCIAL

Commercial mean response:

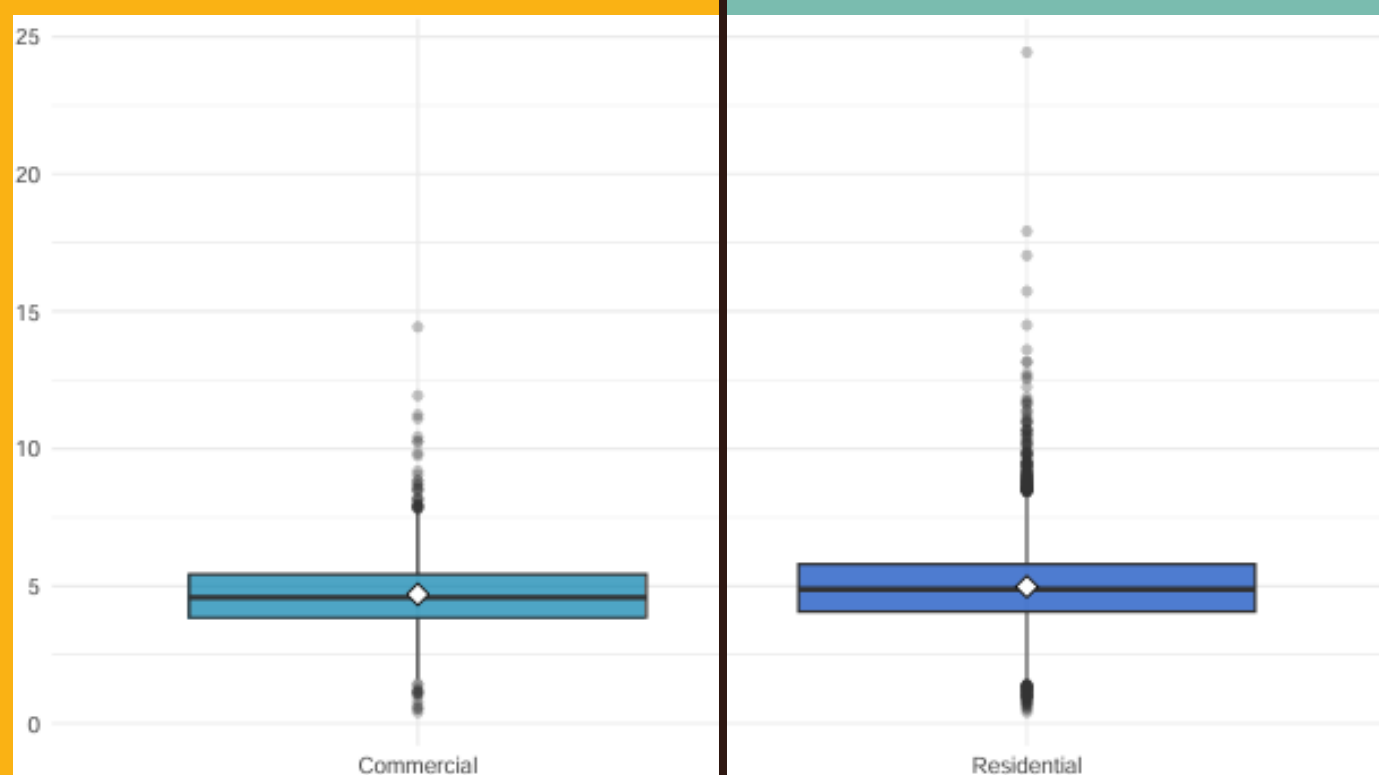

4.70 min

The analysis reveals that commercial fire incidents receive slightly faster fire response times, where the mean response time for commercial incidents is 4.7 minutes (SD = 1.37)

RESPONSE

TIME

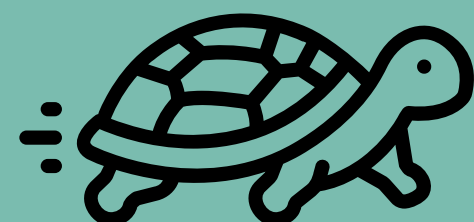

RESIDENTIAL

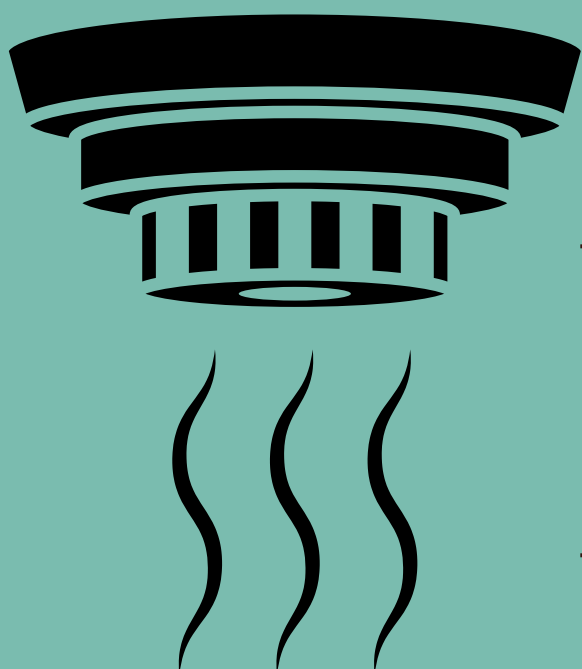

Residential mean response:

4.98 min

The analysis reveals that residential fire incidents receive slightly slower fire response time, where the mean response time for residential incident is 4.98 minutes (SD = 1.41).

LOWER LOSSES WITH SMOKE ALARMS

The presence of a smoke alarm system is associated with significantly lower property losses in fire incidents.

With Alarm: Lower losses
(mean log-loss 7.32)

No Alarm: Higher losses (mean
log-loss 7.49)

FIRE STATUS AFFECTS SUPPRESSION TIME

Extinguished Prior to Arrival

- Average suppression time: 3.6 minutes
- Minimal time needed—fire already out.

No Evidence From Street

- Average suppression time: 14.25 minutes
- Fire hidden or not visible → takes longer to locate and contain.

Smoke Showing Only

- Average suppression time: 18.9 minutes
- Visible smoke signals more active fire → longest suppression time.
